“Like Automation Anywhere, Veracode is a leader in its industry.”

Gautam Roy

Automation Anywhere
Head of Product Marketing,
Security

Founded in 2003, **Automation Anywhere** is a global enterprise software company that has quickly made a name for itself in the robotic process automation (RPA) space, gaining thousands of customers, including Global 2000 and Fortune 100 businesses, in more than 90 countries.

Challenge

Automation Anywhere enables businesses to configure “bots” to automate processes. The bots need to be able to access company and client data, which means Automation Anywhere needs to have extra security measures in place.

Solution

- Responsive and customer centric.
- Easy to start and scale.

Results

- Automated its application security tests for real-time results.
- Launched the first-ever cloud-generated RPA platform, Enterprise A2019.
