

Highlights

- **Unlimited Seats** . SecurityReview imposes no restrictions on number of seats, departments, or users of the service.
- **Unlimited Scans** . Your subscription gives you unlimited access to both static and dynamic scanning on the platform.
- **100% Code Coverage** . By scanning the binary code, SecurityReview provides the most comprehensive coverage of the entire code base, including detection of malicious code and backdoors.
- **No Hardware, No Software**. Security-as-a-Service (SaaS) delivery lowers costs and eliminates resource-intensive installation & maintenance concerns.
- **Independent Standards-Based Ratings** . Ratings are based on NIST, CWE & CVSS to meet auditing & compliance standards.
- **Rapid Time to Value** . Get accurate, actionable results within 24-72 hours.
- **Diverse Application Coverage**. Manage security risk across your entire application portfolio- in-house, outsourced, commercial and open-source applications.

SecurityReview[®] for Application Risk Management

Veracode's SecurityReview[®] is delivered as a turnkey service that can be customized to fit your organization's unique needs and accommodate the changing threat and security requirements landscape.

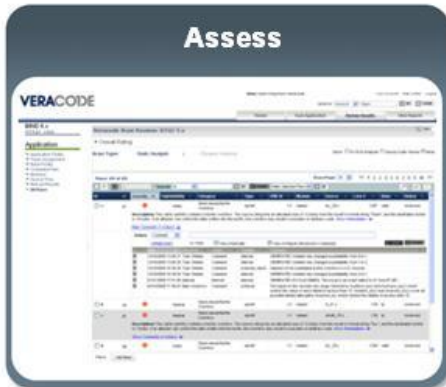

Standard Edition

SecurityReview's Standard Edition empowers organizations with a robust solution to quickly kick-start and operationalize a security program that covers your entire mixed application portfolio. It provides unlimited access to a centralized application risk management platform, multiple testing techniques and security intelligence information on open source projects.

Enterprise Edition

SecurityReview's Enterprise Edition augments the Standard Edition with additional features that enable you to implement a comprehensive application risk management and developer training program across diverse, geographically distributed teams and supplier networks. It provides eLearning, security advisor services, cross-platform integration and co-branding capabilities.

| SecurityReview [®] Solutions | Standard Edition | Enterprise Edition |
|--|------------------|--------------------|
| Application Risk Management Platform | ✓ | ✓ |
| Automated Code Review (Static) | ✓ | ✓ |
| Automated Web Vulnerability Scanning (Dynamic) | ✓ | ✓ |
| Open Source Ratings Database | ✓ | ✓ |
| Phone and Email Support | ✓ | ✓ |
| Security Program Advisor Hours | | ✓ |
| eLearning | | ✓ |
| Technical Account Manager | | ✓ |
| API/Archer Integration | | ✓ |
| Co-Branding | | ✓ |

Application Risk Management Platform

Leverage a centralized view of risk and security information to manage, set policy, track and report on your application portfolio across your entire enterprise; available 24x7 through Veracode's web-based SaaS platform hosted in a secure SAS70 Type II and Systrust certified facility.

Automated Code Review (Binary Static Analysis)

Veracode's patented automated static binary analysis reviews code in its "final" compiled version, including libraries and 3rd party components, without requiring organizations to expose their intellectual property in the form of source code. This approach results in the most accurate and complete security testing available in the industry.

Automated Web Vulnerability Scanning (Dynamic Analysis)

Veracode's automated web application vulnerability scanning, also known as dynamic analysis or black-box testing empowers companies to identify and remediate security issues in their running web applications before hackers can exploit them.

eLearning

SecurityReview integrates web-based secure programming training modules and a knowledgebase for developers and security personnel to meet formal training and competency testing requirements for OWASP Top 10, SANS Top 25 and other industry standards.

Open Source Ratings Database

Access Veracode's database of security ratings for enterprise-class open source projects enabling you to gain an understanding of the risk/benefit trade-off of integrating open source versus commercially developed software.

API/Archer Integration

The integration of Veracode's SecurityReview® within the Archer SmartSuite Framework provides direct access to Veracode's application risk intelligence, allowing organizations to further capitalize on their Archer investment and centralize the management and reporting of critical business intelligence across their enterprise.

Security Program Advisor Hours

Enterprises can access Veracode security experts for a full range of application lifecycle services such as application portfolio management recommendations, detailed remediation advice and application security strategy review.

Technical Account Manager

Your Technical Account Manager (TAM) is a designated day-to-day liaison for technical support and account questions available to you, as needed.
