

# Veracode Helps Software Company Advantasure Speed Time to Market, Address Security Regulations, and Gain a Competitive Advantage With Veracode Verified

Veracode's industry-leading AppSec solution reduces time to remediation for high-severity flaws, improves security and development culture, and speeds up deployment for Advantasure

Advantasure is a leader in the healthcare technology industry, helping to improve the performance of health plans and provider organizations. Advantasure works closely with doctor's offices, hospitals, and healthcare organizations in almost all 50 states.

## Challenge

Advantasure not only needed an application security program that could protect it against cyberattackers, it needed a SaaS-based AppSec program to help it prove compliance with laws and regulations across multiple states.

## Solution

- Access to experts that support program success.

- On-demand reporting.

- Unified end-to-end application security solution.

- Actionable and accurate findings.

- Verified program with a blueprint to achieve the highest-level of AppSec.

## Results

- Reduced its time to remediation for high-severity flaws and sped up software deployment.

- Alleviated the training burdens initially placed on its security team by leveraging Veracode eLearning.

- Gained company-wide buy-in for the AppSec program.

- Enabled Advantasure to comply with state and federal regulations.
