

Secure Your Organization by Eliminating Hidden Risks in AI and Open Source Software

The Future of Adaptive Software Security is Veracode

Centralized Risk Management

Developer Friendly Workflows

AI-Powered Risk Prevention &
Remediation

Multi-Cloud, Full Supply Chain
Security

Comprehensive Unified
Platform

Real-Time Risk & Compliance
Reporting

Begin Your Journey
with Veracode

Prepare for a Surge in AI-Driven Risk:

AI Security Risk

Using AI-generated code increases your security risk by more than 55%. As LLM maturity increases, code security decreases.

Open-Source Security Risk

Using OSS increases your security risk, the amount of AI-generated code in open-source projects has jumped from 38% to 55%.

Co-Pilot Security Risk

Using Microsoft Co-Pilot increases code security risk by 45%. AI now generate 30% of new GitHub code, and up to 61% in languages like Java.

Supply Chain Security Risk

Relying on third-party components raises security risks, as AI-generated code now makes up 55% of open-source projects.

Stop Risks in AI and the Software Supply Chain at the Start

DEVELOPMENT

Accelerating Comprehensive Security Coverage

Veracode offers comprehensive support for all major IDEs and over 100 integrations with the tools developers rely on most. We provide the broadest coverage for both legacy and modern languages, with AI-powered remediation seamlessly integrated into developer workflows.

REPOSITORIES

Integrating Security without Slowing You Down

Integrated with all major code repositories, offering real-time monitoring and protection as code is checked in. Our AI-powered solutions detect supply chain and license risks, providing fix recommendations without disrupting your workflow ensuring your code stays secure and compliant—without slowing you down.

CLOUD

Continuous Risk Detection And Visibility

Continuous risk detection and real-time visibility across your cloud environments with comprehensive monitoring and advanced analytics—enabling end-to-end security from code to cloud and guiding the best next steps to ensure compliance.

Discover if a unified platform with real-time visibility, rapid remediation, and robust compliance support the right choice for your team

Get in touch today

For over 20 years Veracode has been singularly focused on software security, and it shows in every product we deliver.

Our focus has always been and will always be security. It's not an add-on for us like it is for others; it's who we are.
