“The use of Veracode's unified platform has streamlined the process of identifying and escalating security issues, providing clear visibility to both developers and management.”

Francisco Sánchez
Nauffal
*IT Security Director,
EcoVadis*

Founded in 2007, **EcoVadis** is a purpose-driven company providing globally trusted sustainability intelligence on an interactive platform to help organizations comply with ESG regulations and improve the sustainability performance of their value chains.

Challenge

EcoVadis was looking to identify the best starting point for addressing security issues, needed to ensure that security scans were conducted as close to the developers as possible, and wanted to engage developers in security learning.

Solution

- Automate security measures in software development
- Streamline the detection and escalation of security issues
- Advance security and agility

Results

- Enhanced Security Posture
- Improved Team Collaboration
- Executive Buy-In
