

Veracode

Everton Yoshitani

VP of Engineering at Resola Inc

I like the ease of integration and onboarding

Apr 16, 2024

What is our primary use case?

“Veracode is a DAST solution that we use for automated security scans of our APIs and front end. We perform daily scans of our applications so we can act on the results quickly instead of routine security audits that we might do yearly or quarterly. It's a complement to the standard penetration test suite.”

How has it helped my organization?

“Veracode helps us improve our overall security and build trust with our customers. For example, some of our customers have strict security requirements, and they need us to use more products. It helps our business by building confidence in our products' security. Veracode improves our sales and helps us secure contracts because we can demonstrate what we are doing to the clients.

We can use it in our dev environment to detect issues early before they get into production. It saves time equivalent to one full-time security engineer. We have around 60 people on the team, but we don't need a security engineer. Our

regular engineers can fix the issues themselves based on Veracode's report. ”

What is most valuable?

“I like Veracode's ease of integration and onboarding. You can quickly and easily get started with a new project or application. That's one area where Veracode shines relative to other tools we've evaluated. Other tools need more work or an engineer to do the setup. With Veracode, you can do the onboarding in a few steps quickly.

Another beneficial feature is Veracode's reporting. The report not only outlines the security issues in detail but also offers some solutions. Even if one of our backend engineers isn't specialized in security, they can still fix the issue solely based on the suggestions in the report. ”

What needs improvement?

“When Veracode updates the pool of tests and security checks, it could be a little more transparent about what it is releasing. It's not clear what it's adding. They do thousands of checks, and when they add more, there aren't many details about what the new tests are doing. ”

For how long have I used the solution?

“I have used Veracode for 2 years.”

What do I think about the stability of the solution?

“I rate Veracode 10 out of 10 for stability.”

How are customer service and support?

“I rate Veracode support 8 out of 10.”

Which solution did I use previously and why did I switch?

“Veracode is the first tool we purchased specifically for DAST testing. We we use altered secure tools, and we used to do penetration test, but using people. Right? Not not automated.”

How was the initial setup?

“Deploying Veracode was straightforward. There weren't many steps. We needed to prepare our API specifications and set up our system. ”

What's my experience with pricing, setup cost, and licensing?

“The price is worth it. You have to consider the cost versus the security Veracode provides. It's also cheaper than the other solutions we considered. ”

What other advice do I have?

“I rate Veracode 9 out of 10. ”

Which deployment model are you using for this solution?

Public Cloud

If public cloud, private cloud, or hybrid cloud, which cloud provider do you use?

Amazon Web Services (AWS)

About PeerSpot

PeerSpot is the leading review site for software running on AWS and other platforms. We created PeerSpot to provide a trusted platform to share information about software, applications, and services. Since 2012, over 22 million people have used PeerSpot to choose the right software for their business.

PeerSpot helps tech professionals by providing:

- A list of products recommended by real users
- In-depth reviews, including pros and cons
- Specific information to help you choose the best vendor for your needs

Use PeerSpot to:

- Read and post reviews of products
- Access over 30,000 buyer's guides and comparison reports
- Request or share information about functionality, quality, and pricing

Join PeerSpot to connect with peers to help you:

- Get immediate answers to questions
- Validate vendor claims
- Exchange tips for getting the best deals with vendor
